

ICILS 2018

IEA General Assembly
October 2015

International Association for the Evaluation of Educational Achievement

ICILS 2018

- Results from ICILS 2013 stimulated policy debates in many countries
- As announced at the last GA, ICILS will continue with a new cycle
- Main survey is scheduled for 2018
- First NRC meeting conducted connected with last NRC meeting of ICILS 2013 (March 19./20.)
- We saw vivid interest from countries for an upcoming cycle

EC

- The European Commission also presented their willingness to support the participation of European countries in ICILS 2018 at the NRC meeting
- Finally beginning of September the EC announced to us that they will not support member states in participating

Country interest

- Countries firmly committed for ICILS 2018:
 - Denmark, Italy, Kazakhstan, Slovak Republic, Uruguay
- Countries committed but not official signed in, yet:
 - Chile, Germany, Korea, Turkey
- Countries who expressed interest:
 - Brazil, Canada, China, Hong Kong, Portugal, Russian Federation, South Africa, United States

Option: Computational Thinking

- Computational Thinking was discussed as an optional domain to be assessed
- Countries showed strong interest
- Discussions with Microsoft about potential funding for the development

ICILS schedule

- Due to the slow process of countries signing up for the study (partly caused by the delayed EC decision), developments were put on hold until recently
- This has implications for the further schedule
 - Q2/2016 Pilot
 - Q1-2/2017 Field Trial
 - Q1-2/2018 Main Survey NH
 - Q3-4/2018 Main Survey SH
 - 2019/2020 Reporting
- If Northern hemisphere countries are interested in postponing the assessment to 2019 together with the TIMSS assessment, the study center will be open accommodate this

What's next

- One to two module needs to be developed to replace the published module
- Framework needs to be updated
- ACER started working on ICILS 2018
- IEA DPC started developing the assessment software
- The option of a coding skills assessment will be pursued further
- It will also be evaluated how far a delivery on tablet devices is feasible

Thank you for your interest!
