PIRLS inside classroom

Anabela Serrão

27 September 2023 | 64th IEA General Assembly
Portugal participates in several international studies

- PISA (since 2000)
- PIRLS (since 2011)
- TIMSS (since 1995)
- ICILS (since 2018)
IAVE has been very committed to the goal of making teachers and schools aware of the framework and other released materials used in studies like PIRLS.

Having this in mind IAVE prepares every cycle a set of materials to disseminate results from international studies.

This includes national reports, brochures, leaflets, and a publication with the released items.
PIRLS 2011 - Textos e itens disponibilizados ao público

4.ª Ano de escolaridade

Released items
Realeased items
A national version of the IEA Teacher Snippets XL dedicated to PIRLS was produced and published on IAVE’s and IEA’s websites.
➢ It was also presented in a webinar dedicated to Portuguese teachers in May.
➢ This webinar was presented by Paulina Korsnáková from IEA and Paulo Tapadas, our national reading expert.
As part of the dissemination strategy, since 2019 IAVE have been promoting several webinars and short-term trainings for primary teachers and language teachers.

This teacher training has as main goals the presentation and exploration of the PIRLS framework and the released items and coding guides.

Through the exploration of all the elements of an item, including the purpose for reading and the associated process of comprehension, Portuguese teachers can debate on new strategies for working with students inside the classroom.
